# Taher Barakat

## Software Developer

Damascus, Syria  |  +963938907414  |  taber.barakat12223@gmail.com  |  My Portfolio  |  LinkedIn  |  GitHub

Software Developer with 3+ years of professional experience at Syriatel Mobile Telecom, specializing in Angular and .Net development and responsive web applications. Skilled in building reusable components, implementing state management, and API integration, with a commitment to writing clean, maintainable code.

## WORK EXPERIENCE

**Software Developer**                                                                                                              *02/2023 – Present*
**Syriatel Mobile Telecom**                                                                                                                          *Damascus*

- Maintain and enhance reporting systems related to sales, ensuring accuracy, efficiency, and scalability.
- Collaborate on the development and optimization of systems built using Angular and .NET Core to support sales reporting and analysis.
- Gathering data from many sources and applying classification on it to facilitate and standardize reporting.
- Make dynamic dashboards related to business scope.
- Initiate special analysis reports and studies that reflect sales and marketing information analysis points of view.
- Provide the concerned department with the requested reports using the latest available techniques.
- Provide internal customers in MIS Management Information System with the list of eligible subscribers to certain offers.
- Conduct pre-offer studies to locate segments of subscribers, spot market opportunities, and possible chances and risks.
- Manage offers behavior from the database side (find eligibility and its segmentation depending on specific criteria).
- Prepare yearly revenue budget template to gather all the necessary inputs from the Marketing Department and apply logical evaluation to issue yearly revenue budget.

## PROJECTS

**Sales Reporting System (SRS)**
Daily and monthly sales performance reporting system for dealers and sub-dealers network.

- Generates tabular reports with sales metrics (new lines, revenue, goal achievement) and provides comparative analysis of dealer/sub-dealer performance.
- Organizes sales data by teams and regions for targeted performance review.
- My participation in SRS was implementing a mail service that allows users to customize report parameters and scheduling based on individual preferences.

**Corporate Reporting System (CRS)**
Corporate/VIP customer activity reporting platform.

- Tracks corporate line activations, offer subscriptions, and usage patterns also provides segmented views of VIP customer activities.
- Delivers standardized monthly reports for corporate account management and consolidates data from multiple billing systems into unified reports.

**Product Monitoring System (PMS)**
Marketing product performance analysis tool with historical data.

- Tracks subscriber counts and revenue per offer/bundle.
- Provides monthly activation trends through comparative charts.
- Enables product classification analysis (prepaid/postpaid, segment-based).
- Supports marketing decisions with historical performance data.
- I built an admin tool for supervisors to manage roles, control table content and behavior, and modify queries/conditions dynamically.

## EDUCATION

**Bachelor Degree in Telecommunications & Electronics Engineering**                                    *15/11/2016 – 12/11/2024*
**Damascus University**                                                                                                                                  *Damascus*

## SKILLS

**Web Development**
Proficient in developing modern and efficient web applications using Angular, React.js and .NET Core. Extensive experience in building reusable components for scalable and maintainable code.

**Version Control**
Proficient in utilizing version control systems, particularly Git, for collaborative and streamlined development processes.

**State Management**
Expertise in state management libraries such as Redux, RxJs and NgRx, ensuring efficient data flow and application state control.

**Responsive Design**
Adept at creating responsive and visually appealing user interfaces, ensuring optimal user experience across various devices and screen sizes.

**API Integration**
Skilled in Building and integrating RESTful APIs and third-party services using .Net Core to enhance application functionality and data retrieval.

**Database Automation**
Experienced in developing automated procedures, jobs, and packages using Oracle PL/SQL. Skilled in creating scheduled database jobs, ETL processes, and data transformation routines to streamline reporting workflows and maintain data integrity.
